Advanced Data Structures and Algorithm Analysis Lab - II Year - I Semester - 2026-2027 - 2026

Advanced Data Structures and Algorithm Analysis Lab - II Year - I Semester - 2026-2027

1. Program to implement AVL tree and its operations
2. Operation of B-Tree - Insertion, Deletion and Search
3. Min Heap Operations
4. Max Heap Operations
5. Depth First Search (DFS) on a Graph
6. Breadth First Search (BFS) on a Graph
7. Depth-First Search (DFS)
8. Breadth First Search (BFS)
9. Bi-Connected Components in Graph
10. C program that implements the quick sort
11. C program that implements the merge sort
12. Shortest Path from Source to Vertex
13. Job Sequencing using Greedy Problem
14. Program to implement Knapsack problem Using Dynamic Programming
15. N-Queens Problem
16. Knapsack using backtracking
